**Class 3 Permit Modification Request: Spray Tank Demonstration Test of the Metal Parts Furnace at the Tooele Chemical Agent Disposal Facility**

<b>Facility</b>	Tooele Chemical Agent Disposal Facility (TOCDF) P.O. Box 250, Stockton, Utah 84071-0250
<b>Proposed action</b>	The Executive Secretary of the Utah Solid and Hazardous Waste Control Board proposes to approve a Spray Tank Demonstration Test Plan submitted by the TOCDF to allow drained nerve agent VX Spray Tanks to be treated in the Metal Parts Furnace (MPF). The test will include three runs feeding up to 22 pounds of VX per Spray Tank. Metals composition tables in the TOCDF Hazardous Waste Permit will be updated for Spray Tanks to include lead in the nose cone. The Spray Tank Demonstration Test Plan and appendices describe the monitoring that will be conducted to measure the emissions from thermal treatment of the Spray Tanks in the MPF. Based on meeting performance standards and being protective of human health and the environment, the operating conditions and metals feed rates will be finalized in the Permit for long-term Spray Tank processing. Public comments will be considered in the final decision on the test plan, test plan appendices, and Permit change pages.
